

## ENTECCO E-SERIES

Thank you for considering ENTECCO Filter for your dust collection requirements. The E-Series line of dust collectors for woodworking can be installed **indoors** or outdoors (covered or closeted) to comply with NFPA requirements. There are three sizes available with four motors for nine different configurations.

### FEATURES AND BENEFITS

- Standard configurations **ship in a week** and **set up in an hour**
- Designed, fabricated, and assembled in **High Point, NC**
- Backward inclined fans provide **more suction** than competitive models
- **Compact** footprint is less than 4' deep and 8'-8" to 12'-4" long
- Just 10.5' tall and 93" shipping height
- 371 to 620 square feet of media means **suction is maintained**
- Upgrade to **ePTFE Membrane** for finer dusts and best cake release
- Optional **Vibratory Cleaning Device** (adds 6" to height) aids in cleaning the filter bags when the fan is off - especially effective on MDF
- Quiet operation below 85 dBa
- FIVE discharge options:
  - Two 45-Gallon **Bags**
  - Two 60-Gallon **Totes** with Casters (pictured)
  - Mix and match with **Bag and Tote**
  - 300-Gallon (1.5 Cubic Yard) Front-Access **Dump Bin** on E32xx and E40xx
  - Rotary **Airlock** with Chute or Drop Tube
- Optional 2.5' **Leg Extension Kit** provides clearance under airlock when installed outdoors
- Fan motors **Pre-Wired with 15' Pigtail** in 10 ga (7.5 and 10 hp) or 8 ga (15 and 20 hp)
- Direct and Variable Frequency Drive **starters available** for 3-phase (460V, 230V, 208V)
  - **Pressure Transducer Kit** available to control VFD
